

When it comes to delivering engineering solutions for embedded software, hardware, and mechanical projects, Triple Crown Consulting is your reliable partner. Here is how our team conquers your engineering challenges.

THE WHO

The best technical program leaders the industry has to offer, bringing decades of relevant, real-world experience to the forefront of each engagement. **Experts like:**

Ed Pastelak

Triple Crown's VP of Engineering, offering 30+ years of expertise across life science, defense, and manufacturing sectors, to name a few

Brad Boekes

Leveraging deep expertise as the Director of Technical Programs to deliver complex software and systems projects in aerospace, space and defense

Jeff Sabuda

Bringing 25+ years in semiconductor design and development to deliver top-tier solutions across industries as Triple Crown's Chief of Silicon

THE WHAT

Engineering Services delivered with speed and precision, ensuring each project is expertly managed and executed. Clients benefit from the extensive engineering talent that Triple Crown has cultivated over the last 20 years.

Engineering. Design. Development. Test. Validation. Verification. We do all that and more. And all in line with your industry-specific quality specifications, protocols, certifications, and regulations.

THE WHERE

Wherever you need us, our highly qualified engineers and project managers are prepared to deliver exceptional support.

THE WHEN

Everything happens within your tight timelines: scoping the technical approach, building an engagement model that meets you at your need, and delivering the program. For your niche resource needs, we're on it fast—within hours and days, not weeks and months.

THE HOW

Delivery models fueled by an expansive network of 6,000+ elite engineers, fully vetted and aligned specifically to project needs. Along with Triple Crown Consulting's team that is committed to the shared values of urgency, transparency, and accountability.

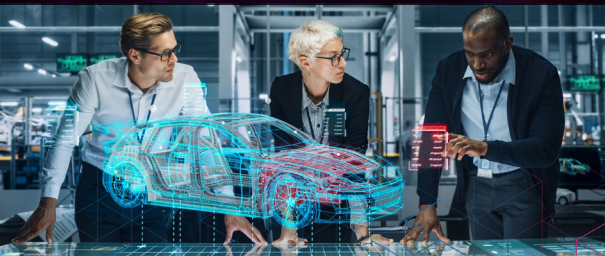

THE WHY

So you don't have to worry about how you're going to get it all done.

THE PROOF

It comes down to projects successfully delivered with complete confidence. Projects like these, and an endless array of other examples:

- ✓ New cell viability and protein analyzer software, built to ISO13485, 21CFR Part 11, GMP, and state-of-the-art privacy and security standards
- ✓ The design of a handheld ultrasound, including the FPGA, board design, software, and verification
- ✓ An ASIC upgrade for a 10 gig interface derivative
- ✓ Development and testing of hardware and controller software for a space travel turboshaft engine
